THE TRACK-O : UNMATCHED SAFETY & PRODUCTIVITY, OUR CLIENTS HAVE SPOKEN!

« Compressors up stairs, pump engines into buildings, landscaping material into backyards, make up air units to the basement, cement benches at a conservatory, and transformers up and down two flights of stairs are just a few jobs well done with the Track-O alone or in conjunction with our mini cranes. »

We are continually impressed with Track-O's ability to get heavy loads through rough sites, up and down stairs and through doors. Track-Os have added a truly unique layer of innovation, versatility and unequalled service to our company. Thank you Track-O. »

Don Lucas
Encore Crane, Trucking & Transport Ltd.
 Edmonton, Alberta

To see the Track-O go down the subway stairs loaded with 800 lbs of fibre-optic cable was impressive.

Easy to operate and completely safe, the Track-O was a large contribution to the success of our project.

Roger Boily
